

A light blue background featuring a collage of various items related to creativity and technology. On the left, there is a book titled 'SPRINT' by Jake Knapp, with the subtitle 'SOLVE BIG PROBLEMS AND TEST NEW IDEAS IN JUST FIVE DAYS'. Above the book is a fan of cards, one showing '2/18' and another with a question mark. In the center is a large white tablet or screen. Below it is a white keyboard. To the right of the keyboard is a white mouse. Further right is a pair of glasses, a hand holding a pen, a magnifying glass, and a smartphone. The overall theme is about innovation and problem-solving.

Vefskólinn

< An overview of the program />

< Who are we />

- Smári
 - Teaches code and technical stuff
 - Has been here since the 2015 (since the beginning)
 - Loves coding and web development related stuff, anything to do with sitting and thinking
- Jakub
 - Teaches design UI/UX and some code
 - Has been here since 2022
 - Loves design, code, video games, music and trying new things
 - Former student of vefskólinn

< History of Vefskólinn />

- 2015 - Vefskólinn is established and is housed in Vörðuskóli
 - Jonni and Davíð started the school with help from many specialists

 - Smári started to work for the school
- 2019 - Moved to 4th floor of Stýrimannaskólinn
- 2020 - Moved to Hafnarfjörður in
 - The program was shortened from 2 years to 1 year + summer internship
 - Started teaching in English
- 2022 - Jakub joined the force

< The program />

The study program of Vefskólinn is divided into 8 modules:

1. Introduction to web development - 2 weeks
 - a. Basic guides in design and coding (HTML and CSS)
 - b. One week group project
2. Community module - students work on this the whole time
3. Web development basics
 - a. Introduction to JavaScript
 - b. Introduction to UX and UI
 - c. Two weeks group project
4. Connecting to external services
 - a. Introduction to JavaScript frameworks
 - b. Design thinking and responsive web design
 - c. Three weeks group project
5. Back-end development
 - a. Guides for 2 weeks
 - b. Group project for 2 weeks
6. Advanced topics
 - a. Combine all the things you have learned in JavaScript
 - b. Advanced Design Thinking concepts and deep dive into UI concepts
 - c. Four week group project
7. Specialization project
 - a. Individual project where students choose a topic of their interest to deep dive into
8. Internship - 12 weeks

< Design />

There are two aspects when it comes to design in Vefskóli there is UI - User Interface and UX - User Experience.

In the User Experience we focus on what user experience on our website.

In the User Interface we focus on the visual aspects of our website.

< Coding />

The program aims to get the students from zero to hero in web development.

Starting with the basics and ending with everything you need to know to become a web developer in a typical web agency in Iceland.

The companies that have had students as interns agree that the strength of Vefskóli students is that they have good soft-skills, know how to work in a team and know how to take a project from idea to solution.
